If you are in doubt what goes into which category, first and foremost use your brain. Usually your first choice is the right one. If you are still in doubt check down below. If you are still in doubt, you can hop onto #Uploaders and ask around. If you think that anything needs changing then you can either reply in here or bring it up in #Uploaders.

Back

Category	Sub-Category	Description of when to use it
Movies	Cam ②	This category is only to be used for CAM sourced encodes.
	TS/TC	Only Telesyncs and Telecines sourced encodes.
	HDRip ③	Any HDRip not sourced from Bluray or Web.
	DVDrip / DVDScreener	Any encodes sourced directly from a DVD.
	DVD-R ①	Full/COMPLETE DVD Image or DVD Remuxes.
	WEBRip ⑪	Any encodes from web sources of like iTunes, Netflix, Hulu or Amazon Prime or other streaming service.
	BlurayRip ③	Any encodes sourced directly from a Bluray.
	Bluray ⑧	Full/COMPLETE Bluray image or Bluray Remuxes.
	4K	All 4K releases.
	Boxsets	Boxsets of sequels, prequels, actors, directors etc.
	Documentaries	All documentaries.
	Foreign	Any Movie of any quality that is not in English as the primary audio track.
TV	Episodes	All SD, single episode torrents.
	Episodes HD ②	All 720p, 1080p, and 2160p/4K (HD and UHD), single episode torrents.
	Foreign ②	Any TV episodes and boxsets of any quality that are not in English as the primary audio track.
	BoxSets ⑥	Any Season/Series/Boxset pack of TV episodes, excluding anime and cartoons.

Games	All Platforms	This category is pretty self explanatory. The game's platform dictates which category should be used.
	PC ③, Mac	PC/Linux, Mac Games
	XBOX, XBOX360, XBOXONE	X-Box Games
	PS2, PS3, PS4, PS5, PSP	PlayStation Games
	Wii, Nintendo DS, Nintendo Switch	Nintendo Games

Music	Audio	Everything Audio related MP3, FLAC, OOG etc.
	Music Videos	Anything with moving pictures.
Books	EBook ③	Any and all releases that are not comics, including audio books.
	Comics	All comics go into this section.
Applicators	PC-ISO ④	All PC platform applications, including Linux (which should be clearly labelled as Linux).

	Mac	All Mac platform applications.
	Mobile	All mobile (like Android and iOS) platform application.
	0-day	All 0-day packs.
Animation	Anime	Anything anime, regardless of quality. Including full seasons, series, and boxsets.
	Cartoons	Anything cartoon, regardless of quality. Including seasons, series, and boxsets.

Education	Education ①	Any educational products go into this section. Keep in mind that an eBook still goes into the eBook category.
For Movies and TV it is possible that a release can fit into more than one category, when this happens you should use the following hierarchy and use the first one that applies.		

Foreign or Anime >> Cartoons >> Boxsets >> Documentaries >> 4K >> All other categories.

Torrentleech does not allow any pornographic material. We run our sister site at www.pussytorrents.org for that. Want to upload there too? Shoot bunnmaster a pm.

Is There Any Moderation for the Bluray Category? ②

Uploading Guide ①

When did 720p become Bluray?

Category for this?

Very clearly explained mate, but too many badly configured bots here miscategorising everything...

If you see a trend then let me know, we only have two bots.

Thank you Zdeeve.

Some trends:

E = Puts 2160p foreign as ordinary 2160p

and: quote

"4K Upscaled/UHD LQ

Most 4K content is real 4K, this category shouldn't be used unless you know it's been upscaled.

Real 4K UltraHD HDR

All recent 4K releases go into this category, unless you know for certain it's upscaled."

I got the info from reeXn that wXXt decided that we should have only one 4k category, not have them split, got this a few weeks ago. is this an old copy paste or has things changed?

•

"BlurayRip"

If the source is not a BD but an encode, your torrent goes into this category. - Maybe a bit confusing for new/unexperienced uploaders when you combined it with below:

"Bluray"

Bluray source directly from an actual BD go into this category.

Maybe more explained, a BlurayRip also comes from an "actual" BD. Maybe add to "Bluray" that the category and disk structure shall be intact and that .mkv, .mp4, .avi etc etc isn't allowed, only .iso, .img or unrarred in a category.

Also where did "Remuxes" go?

Otherwise awesome zdeeve, always good when memory fails ☀

Best Regards...

My understanding of the above is that "Bluray" should only be full Bluray disks or Remuxes. Is this correct? If so, why is "Bluray" full of everything Bluray related and only a few of us use the "BlurayRip" category?

The way these 2 category's are currently used they should just be combined into 1.

Yep, revisiting the categories is a long term wish but doesn't have priority atm. Just try to stick to the categories as much as possible, we will revisit them eventually.

Where should HD-DVD encodes go? It seems wrong to put them in DVDRip/DVDScreeners since HD-DVD is closer to Blu-ray than to DVD, quality-wise. Actually HD-DVD is on par with WEB-DL but putting them in WEBRip seems even stranger. I thought HDRip might make sense until I read the "Xvid or DivX" description here.

HaArD

I always treated HD-DVD as the "same" as Bluray.

Can this information be made available to requesters please? I didn't follow...

info. Since filters who are not staff or updaters do not have the ability to edit their torrents to the correct category before hitting go.

Maybe something before hitting go? Stop! Did you read the rules, the request just trying to help?

I don't think the Bluray/BlurayRip, this bluray have been in Scene, now decided, that the new terms, but won't go away from RAR files.

And I was just going nuts, that info I changed my uploads to Bluray 4 times, and I went to RAR files, and just saw this, no life to upload as a bluray in my Uploader info tab, and I went to RAR files, and now have to tell everybody that you have to write BDrip at my torrentname, named

Bluray. Good luck...
